

HAWAII WILDLIFE FUND

MISSION STATEMENT

TO SUPPORT CONSERVATION OF HAWAII'S NATIVE WILDLIFE THROUGH RESEARCH AND EDUCATION

Hawai`i Wildlife Fund is a non-profit research and education organization dedicated to the conservation of Hawai`i's native wildlife. We collaborate with other scientists to obtain knowledge about threatened and endangered species in order to assist in their recovery. We forge alliances and partnerships with community organizations and businesses to educate visitors and residents of Hawai`i about the marine ecosystem and impending threats. We support various University of Hawai`i student projects through research and education programs.

Hawai`i Wildlife Fund is specifically dedicated to:

- ❖ Provide funding for Hawai`i wildlife conservation, research and education proposals from qualified scientists, university programs, and private organizations.
- ❖ Provide a natural history education program that will supply educational materials and train individuals to be instructors to the general public on Hawai`i's wildlife.
- ❖ Perform research on Hawai`i's wildlife and ecosystems to facilitate identification and resolution of problems threatening their existence.
- ❖ Solicit funds to finance the above objectives from the Hawai`i community and other sources.
